Key Review Points

- Churn rate is **19.42%** (18,176 of 93,587 customers).
- Revenue lost is **395.6K**, with **487K** still at risk monthly.
- High Risk customers churn at 37.5% and cause about **287.16K of lost revenue**.
- Cancellation reasons are evenly spread. **Service, billing and content issues** make about 50%.
- Plan, gender and age show no real difference.
- Complaints don't predict churn (about 19–20% at every complaint count).
- Churn is flat at about 2.6–2.7K a year from 2020 to 2024. The 2026 figure is partial.

Business Recommendations

- Offer **retention deals** to High Risk customers first.
- Fix service, billing and streaming quality.
- Run win-back offers, starting with competitor switchers.
- Track the risk score monthly.
- Review how complaints are resolved.
- Resume customer acquisition, since there are no new sign-ups after **December 2024**.
